

America Recycles Day

Spotless the Litter Hound

Hey Boys and Girls,

This is Spotless the Litter hound here, the official mascot for

Pike County Solid Waste Management & Recycling

Meet some members of my "Super Sniffers" Recycling Pack. Eddie the Bear and Frankie the Frog. Eddie and Frankie collect all the recyclables from all of Pike County Solid Waste District's recycling drop off sites.

Be a part of my Super Sniffer Recycling Pack and help Frankie and Eddie by taking your recyclables to one of the recycling drop off sites. Remember to Reduce, Reuse, and Recycle".

Super Sniffers Recycling Pack

America Recycles Day

America Recycles Day is a nationally-recognized day that celebrates and promotes recycling in the United States and falls on November 15th. On this day, people are encouraged to spread the word about recycling and to practice recycling themselves. So be sure to find a recycling program near you so that you can recycle your trash instead of dumping it the garbage to fill up yet another landfill.

Recycling a single aluminum can saves enough energy to power a television for three hours. Yet, every three months, Americans toss enough aluminum into landfills to rebuild the entire U.S. fleet of commercial airplanes, according to the National Recycling Coalition.

Using recycled materials also saves energy and reduces global warming. For example, using recycled glass consumes 40 percent less energy than using new materials. Americans also contribute to recycling by purchasing products with recycled content, less packaging and fewer harmful materials.

Recycling helps to conserve natural resources and reduce greenhouse gas emissions that contribute to global warming. According to the Environmental Protection Agency, recycling one ton of aluminum cans saves the energy equivalent of 36 barrels of oil or 1,655 gallons of gasoline.

Recycling not only saves space in landfills, reuses important resources and saves energy but it also prevents the needless destruction of many aquatic animal species and helps in the fight against global warming. So spend this day figuring out how you can recycle more.

Let's make America beautiful!

Did you know that the average American produces about four pounds of trash per day? Over 80% of all household waste can be recycled. Many things such as magazines, cans, plastic bottles, newspapers, and cardboard can be recycled.

These are some of our local recycling bins

To get started recycling, ask your parents for a place to store your recyclables. Separate the cans in one container, newspaper and paper in another container, plastics in the next container, and cardboard in the next. Then when your containers are full, take them to one of the recycling drop off sites in the County.

Here is a list of our local
Recycling Drop Off Sites

Recycling Drop Off Locations
